

# CCS Technologies

- **Low Monthly Price**

Monitor your entire server for only \$49 a month! We can even monitor multiple servers for an additional \$49 per Server.

- **Daily Monitoring**

We monitor your server(s) and check your backup e-mail reports daily.

- **Auditing Software Included**

Our Labtech monitoring software is included free with the program

- **Quarterly Analysis**

We provide clients with quarterly reports on server health, backup overview and perform a test restore of your data to make SURE it's working.

## Peace of Mind

### Big Business Backup Solutions for Small Business Budgets

If you are looking to avoid costly losses attributed to catastrophic data loss, look no further. CCS Technologies supports hundreds of local businesses. We understand that our clients need their data backed up, but don't necessarily know how to verify if their data is protected. Nor have they ever attempted to recover a lost file.

Are you covered if you experience a fire? Is the person in charge of rotating your backups doing their job? If a thief takes your computer equipment, might he not also take your backups as well?

70% of businesses FAIL within 5 years following a catastrophic loss of data.\*\* Don't be a statistic. Don't worry about whether you are covered. Know that you are by calling CCS Technologies today to discuss how to put your company on the path of preparedness and get "Peace of Mind."
