

CCS Technologies proudly announces our new location at 6261 Lake Michigan Drive, Allendale, effective April 15, 2019!

CCS has an excellent reputation for customer service and that is reflective in the increasing demands for our services. This is great news for us and our customers, however it has made us realize that the Coopersville location no longer meets our current or future needs as we continue to grow. This move will allow us to improve upon the level of services that you have become accustomed to over the last 43 years and meet the growing demands we are experiencing.

It is bitter sweet for us to be leaving a community that CCS has "grown up in." The decision to move has not been taken lightly as we appreciate and value the relationships we have built with businesses and the community. However, we are excited to share with you that we will only be moving 9 miles away and our efforts to grow with purpose and our continued focus on customer's needs will improve the level of services and care that we can offer you. While our location may be changing our commitment to you has not.

If you need repair on a computer, our Allendale location will have a full repair bench after April 30. During the move (April 15-30) please bring your computers to our Grand Haven location at 206 Washington. Thank you for the 43 years of support! See you in Allendale!
